

ACCREDITATION

Quality assurance with lab accreditation and audit processes.

CENTRALIZED SOURCE OF TRUTH

Laboratory accreditation – specifically AASHTO R18 Quality Management System (QMS) accreditation – requires meticulous record-keeping. CMT firms must consistently manage policy and procedure driven information, often across multiple lab locations.

To simplify the certification and approval process, you need a single source of truth for documents and accreditation-related information. MetaField® Accreditation provides a centralized location to store documents and organize information to help meet the R18 standard, allowing you to digitally manage day-to-day lab operations to ensure compliance with your QMS.

A centralized repository for accreditation-related information, including documents, evaluation forms, certifications, and equipment (inventory, calibration, and maintenance), improves efficiency and consistency of training and evaluation processes.

**14-21
Days**

**On average, CMT firms spend
14 – 21 days preparing for audits.**

REDUCE OVERSIGHT AND AUDIT TIME

Paper-based training and certification documents are easily misplaced in file cabinets and therefore difficult to reference during an audit. This can cost you time and money. If you are missing forms or the forms you have are incomplete, preparing for an audit is an overwhelming effort.

MetaField offers a comprehensive solution to store and manage lab accreditation documentation and records. Competency verifications and written evaluations within MetaField support industry standards, and each pre-defined form template is tied to specific testing standards.

With MetaField, reduce on-site audit time by 25 – 50% through accurate and searchable record keeping that can be easily referenced during an audit.

LIMS AND ACCREDITATION INTEGRATE FOR A COMPLETE WORKFLOW

The integrated LIMS software capabilities in MetaField provide your team with full chain-of-custody transparency that starts as soon as samples are collected. Samples are accounted for every step of the way to enable easier collaboration between field and lab technicians, and to ensure accurate analysis and reporting.

MetaField Accreditation provides vital support for laboratory accreditation and audits, streamlining preparation and reducing the costly impact of auditor visits.

- » **Centralized Documents:** Repository for lab-specific accreditation related information, including your firm's QMS manual, policies and procedures, organizational chart, lab position descriptions and biographies, and AASHTO, ASTM, CSA, or other governing standards.
- » **Evaluation Forms:** Record, track, and store field and lab staff training via pre-defined and industry compliant competency verification and written evaluation forms.
- » **Certifications:** Add all personnel technical certifications and track and manage certification expiration dates to support field scheduling and dispatch.
- » **Equipment Inventory:** Manage field and lab equipment inventory, calibration, and maintenance.

Agile Frameworks provides comprehensive software-as-a-service solutions that integrate corporate, field, and lab data for business process automation across architecture, engineering, and construction disciplines. We transform workflows, create high-value data, and deliver outputs you can trust, resulting in industry-leading productivity and profitability.
