METAFIELD TRAINING CENTER

Quickly and efficiently onboard new employees

There's always that time of the year where engineering firms experience a surge in project demands affectionately known as the "busy season." During this time, onboarding new employees to help manage this increasing workload isn't uncommon. However, the biggest challenge is providing consistent, comprehensive training to the new employees while maintaining productivity.

MetaField Training Center is the first and only in-app onboarding solution built for the engineering field and lab data collection industry; enabling your team of professionals to increase the speed and effectiveness of becoming competent in MetaField.

SPEND LESS TIME ONBOARDING EMPLOYEES

Get your employees online and focusing on billable work faster. MetaField Training Center eliminates the manual, administrative process of training your employees on MetaField. With in-app assistance and knowledge at their fingertips, your employees can confidently perform daily tasks in the system, faster.

EMPOWER EMPLOYEES TO SELF-SERVE

It's only natural for questions on a process to rise during a project, but unanswered questions can lead to data errors or project delays. MetaField Training Center provides how-to-guides, interactive callouts, and self-directed learning content so your employees can self-serve and find the answer they need to complete their task in MetaField.

BUILD A CULTURE OF UNIFORMITY AND ACCURACY

It's critical to provide the same onboarding and training for new employees to ensure company processes and best practices are instilled. With MetaField Training Center, you can be confident all your employees are learning operations consistently, reducing confusion and bringing greater accuracy to your projects.

GROW WITH METAFIELD

In order to successfully scale your business, you need a solution that scales with you. We are dedicated to investing in MetaField to provide you with the ultimate lab and field solution that compliments your workflow. With MetaField Training Center your staff will stay in the know when new features and capabilities have been implemented and be able to self-teach on how to use these functionalities. Empowering your employees to unlock MetaField's full potential.
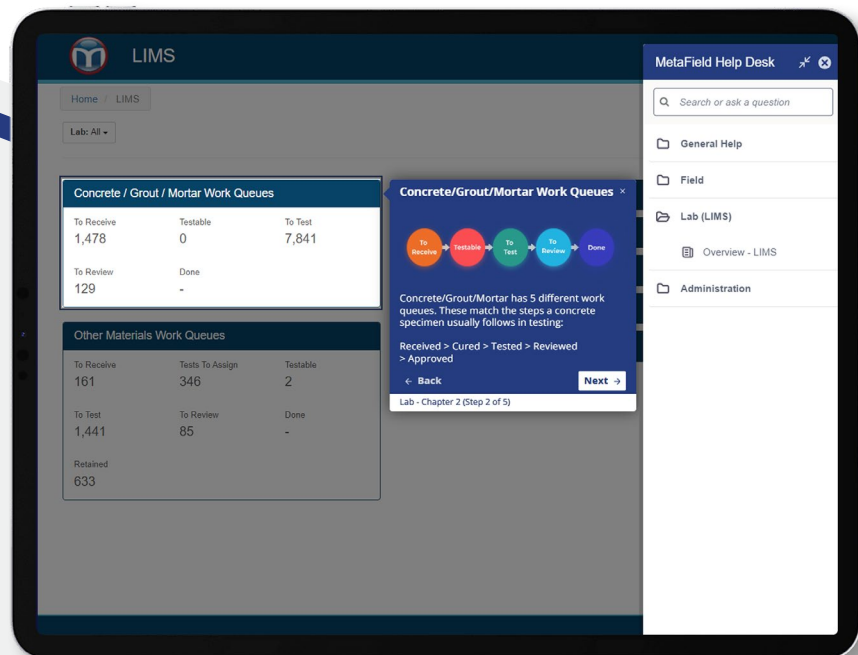

✓ **WHAT'S NEW CONTENT**
An alert informing users when a new feature is available and provides an assisted guide on how to use the new feature.

✓ **SMART TIPS**
Quick tips, definitions, and more that appear when hovered over for various elements in MetaField.

✓ **HELP DESK**
Access help content directly within MetaField to answer questions and provide guidance.

✓ **IN-APP HOW-TO GUIDES**
Available in various areas of MetaField, these how-to guides walk you step-by-step how to use the functionality.

✓ **PERSONALIZED TASK LISTS**
A customized list containing all how-to guides tailored to each user's day-to-day workflow.

✓ **MANAGEMENT OVERSIGHT (COMING SOON!)**
Insight dashboard available to management to track employee training process and performance within MetaField.

WHO USES METAFIELD TRAINING CENTER?

> New offices

> Seasonal employees

> Current employees

> Management staff

Agile Frameworks® provides comprehensive software-as-a-service solutions that integrate corporate, field, and lab data for business process automation across architecture and engineering disciplines. We transform workflows, create high-value data, and deliver outputs you can trust, resulting in industry-leading productivity and profitability.
