METAFIELD MARK DIGITAL SIGNATURES

Fast, secured document approval transactions.

SECURE, COMPLIANT, REAL-TIME DOCUMENT APPROVALS

Formerly known as AgileStamp, MetaField Mark is an integrated digital signature solution, enabling secure document approvals in real-time. Powered by DocuSign®, MetaField Mark is designed to meet the digital signing needs of construction materials testing and related multidisciplinary engineering, environmental consulting, and testing firms.

Paper-based contracts, purchase orders, work orders, proposals, RFIs, change orders, and other documents requiring multiple signatures can result in lost or missing information, frustrating miscommunication, and costly project delays.

Moving from paper-based to digital enables efficient document transactions, along with the ability to easily track and manage required documentation against your project team's workflow

.

Users experience a similar signing process as they did with AgileStamp; however, they no longer need to enter credentials for each signing process, which enhances productivity while supporting efficient batch signing and reporting.

YOUR SEAL OF APPROVAL, SIMPLIFIED

MetaField Mark offers a secure means to approve reports within MetaField without the need to print, sign, and scan. Whether you are on a jobsite or in the office, digitally sign documents any time, from any place, and from any mobile device. It supports a wide range of industry use cases, providing secure signature transactions that are protected in a centralized location.

When using digital signatures, your team gets the approvals they need in minutes rather than hours or days.

"WE LOVE THAT METAFIELD HELPS US WITH QUICK TURNAROUND TIME. I SEE IT ALL ON MY COMPUTER IN REAL TIME, AND GET PROJECTS SIGNED AND OUT THE DOOR THE SAME DAY IT'S DONE!"

— Kenny Broseghini, Sr. Engineer, A.G. Wassenaar

DIGITAL SIGNATURES SPEED UP WORK CYCLES

MetaField Mark offers the following key benefits:

» **Scalable:** accessible and easy to use by a few signers to several thousand users.

» **Configurable:** offers personal signatures and certification stamps, such as state PE seals, with the MetaField Mark Certified option.

» **Mobile-Enabled:** sign documents anytime, anywhere, and from any supported device, and preview and sign reports in one workflow.

» **Cost-Efficient:** complete transactions quickly to take on more billable work and increase profits.

» **Productive:** project stakeholders can sign hundreds of documents for efficient bulk signing and view a full repository of historically signed documents.

» **Secure:** DocuSign provides the highest-secured environment with tampering detection, and MetaField provides added security with an optional two-factor authentication.
